

ProBanner

ProBanner is a bright white, tough propylene substrate for single side printed advertising graphics. The film has excellent lay-flat characteristics and dimensional stability, which allows multiple colors to be applied with precise print registration. ProBanner is easy to sew, grommet, and heat seal and it feeds quickly and reliably through sheeters and printing presses.

APPLICATIONS:

- Banners
- Pennant strings
- P.O.P. displays
- Advertising graphics

ADVANTAGES:

- Superior lay-flat characteristics for easy feeding through sheeters and printing presses
- Excellent dimensional stability for precise color registration
- Easy to print using a variety of methods including screen printing, offset lithography, and flexography
- Easy to sew, grommet, and heat seal
- Economically priced
- Recyclable

MANUFACTURING CAPABILITIES:

- In-line corona treatment
- Thickness range: 6 mil to 12 mil thick
- Standard web widths: 44" - 83"
- In-line slitting to custom roll widths
- Biodegradable available
