

Cast Film and Sheet

Stationery

Film and sheet for office supply products.

Profol produces custom-embossed cast polypropylene film for the manufacture of a wide range of stationery office products. We have extensive experience in this industry with nearly 40 years of proven product performance.

Typical applications.

- 3-ring binders
- Lever arch binders
- Sheet protectors
- Dividers
- L-shaped pockets
- Report covers
- Flat files
- Mailing envelopes
- Coin, stamp and trading card holders
- Gaming card protectors and sleeves
- Archival quality photo album pages
- Photo wallets
- Menu covers and folders
- Notepad holders
- Passport holders
- Checkbook covers
- ID badge holders
- Lamination overlay

Polyolefin film products.

Profol cast films are available in a wide variety of colors, textures, and matte and gloss finishes. They provide good dimensional stability and excellent chemical resistance. Profol films do not contain plasticizers, and they are easy to print and coat with adhesives. They are also copy safe and will not lift print. Acid-free polyolefin film is an environmentally friendly alternative to polyvinyl chloride (PVC) and is 100% recyclable.

Clear Tear-Seal™

Clear Tear-Seal is a transparent polypropylene film that has been engineered to allow for easy weld and tear fabrication. It is an exceptional material for applications requiring toughness, optical clarity and a soft, vinyl-like feel.

ProPlast®

ProPlast is an embossed polypropylene film that provides toughness and tear resistance. It is available in a wide variety of colors and embossed patterns. It has a soft feel that makes it a suitable replacement for vinyl. ProPlast is easy to weld using ultrasonic or thermal welding machinery and has a natural living hinge ability.

SuperClear™

SuperClear is a smooth, optically clear polypropylene film that is engineered to meet the most demanding visual standards. Its superior dimensional stability and excellent lay-flat characteristics allow this film to feed quickly and reliably through sealing machinery, sheeters and other converting equipment.

Manufacturing capabilities.

- Custom colors available
- Multiple embossed patterns
- Corona treatment on one or both sides
- Film thickness range: 25-760 µm (1-30 mil)
- Available machine web widths: 1400-2700 mm (55-106 in.)
- Outside roll diameter: Up to 1200 mm (47 in.)
- In-line slitting to custom roll widths: 80-2700 mm (3-106 in.)
